

# The Power of Mobile Productivity

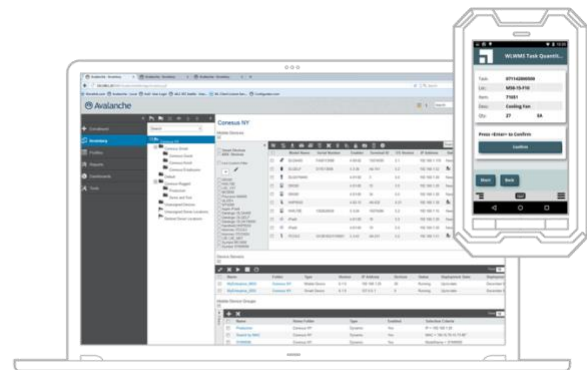

Pick Faster. Stock Smarter. Deliver Better.

**Your business is challenged to improve productivity from retail and supply chain operations every year. Over time, you have optimized enterprise systems and task workflows. A new generation of Android mobile computers offers opportunity, but requires implementation that minimizes risks to business operations, security and customer experience.**

Enterprises need unified solutions that enable greater productivity for mobile users across business functions. Our supply chain mobility solutions are designed to work together—and actually augment the capabilities of each other—ultimately maximizing the capabilities of enterprise mobile applications and the workers who rely on them.

## Platforms for Enterprise System Connectivity

Built on decades of experience, our host connectivity platforms accelerate mobile productivity while eliminating the costs to develop mobile clients for host-interface applications. Compatible with and recommended by all leading Supply Chain Management (SCM) systems, Ivanti makes it easy to access and update information on these systems through telnet and browser-based clients available for Android and Windows Mobile/CE. Mobile enablement without modification to your enterprise systems accelerates deployment and minimizes the costs, risks, and effort involved in implementation.

### Terminal Emulation

Long the linchpin of supply chain mobile applications, Ivanti Terminal Emulation (TE) provides a reliable, proven solution for host-interface mobility embraced by enterprises across the globe. Sixty-eight percent of rugged mobile computers in use worldwide run Ivanti Terminal Emulation, and with TE clients for Windows Mobile, Windows CE, and Android, companies continue to enable more mobile users to access vital SCM information from these versatile mobile clients.

### Mobile Browser solutions

We've got the mobility extensions for your web-based enterprise systems covered. Enhance the capabilities of Pocket Internet Explorer with Ivanti® Industrial Browser, powered by Wavelink. Need a high-powered browser for your SAP ITS Mobile systems? CETerm, powered by Naurtech, is the answer. You can even introduce a secure enterprise browser using VelocityCE.

### Velocity

Bring your existing telnet and web applications to a new generation of Android mobile computers. You control the

pace for a successful deployment, with rapid app migration and modernization tools. Workers accomplish more each shift with intuitive navigation optimized for today's touchscreen Android mobile devices. Avoid the cost, risk and effort associated with re-writing applications, and preserve the investments you've already made to optimize your enterprise infrastructure and systems. Maximize investment in next generation mobile computers, while protecting the future of your mobility business. Our Velocity platform brings renewed power to your existing retail, WMS, ERP, an other host or web-based solutions.

## Voice Enablement

### Speakeasy

The fastest and most cost-effective way to voice-enable your mobile workers. It complements data collection via barcode scanning, RFID, and key-entry by enabling voice-based data entry (speech-to-text) as well as voice direction from an application (text-to-speech). Designed in conjunction with our mobile connectivity products, Speakeasy can be added easily to Terminal Emulation, Browser solutions and Velocity deployments, ensuring complete compatibility. Speakeasy is redefining voice enablement by eliminating complexities such as voice middleware, dedicated voice servers, and proprietary voice hardware that legacy voice applications require. Enterprises that choose Speakeasy gain the benefits of a full-featured voice enablement solution without extended deployment projects. Many Speakeasy deployments are completed in 30 days or less.

## Enterprise Mobility Management

### Avalanche

Using Avalanche for MDM, your mobile devices are ready for today's and tomorrow's business demands. Whether scanners in the warehouse, or tablets on the retail floor, Avalanche helps maintain control of your most critical mobile deployments – keeping them secure, available, and accessible. As you shift to the Android supply chain, Avalanche is ready – having earned Android Enterprise recommended status. We know how important mobile

productivity is to your business. Put our three decades of MDM expertise to work for you.

### Smart Device Remote Control

Downtime is wasted time. As you're considering your next-generation mobile deployments, one obvious expectation is to be able to ensure you can troubleshoot these new, smart devices, minimizing delays whenever possible. Whether caused by mobile device settings or software, the ability to remote in, check out the issue, and resolve it quickly is powerful—and imperative to maximizing worker productivity.

### Xtraction

Operations teams everywhere struggle to measure and communicate metrics around business performance. Enable IT and non-technical staff to create and view interactive reports and dashboards, easily pulling data from Avalanche and other data sources in a single view without coding. Instantly gain insights about your device population, device activity, and more.

## From Point Products to Mobility Strategy

Mobility solutions are becoming strategic for businesses. Narrow-focused, opportunistic point products are no longer proving beneficial for long-term business performance, and along with their disconnected support, are being replaced by unified solutions that deliver comprehensive capabilities for supply chain mobility. Our mobile productivity solutions work together and augment the capabilities of each other—maximizing the capabilities of enterprise mobile applications and the workers who rely on them. Let us help you shape a mobility strategy that meets your goals.
