# Zebra Supplies Inventory Management Solutions

## Three Solutions Designed to Help Manage Your Inventory

Managing your custom label inventory can be a headache; running out of labels can be expensive. Because requirements vary, Zebra has developed three different inventory management solutions. From the simplicity of a blanket order to the power of our Supplies Management Program, we have a solution to help your business save money and run more efficiently.

### Blanket Order

A quick, simple way to make sure your custom labels are scheduled to ship. Provide a single purchase order for a six- or twelve-month supply and pre-schedule your shipping dates. Zebra will produce each release separately and ship on the requested date with no hassles or worries. With a blanket order, you get:

- Price protection
- Pre-scheduled shipments
- Low minimum requirements

### Make-and-Hold

Not sure when you will need your labels? This program provides the flexibility to request shipments when you need them over a 3 to 6 month timeframe. Provide a single purchase order for the entire supply, then send in release requests as needed. Zebra will run the entire supply all at once and hold the labels in our climate controlled warehouse.

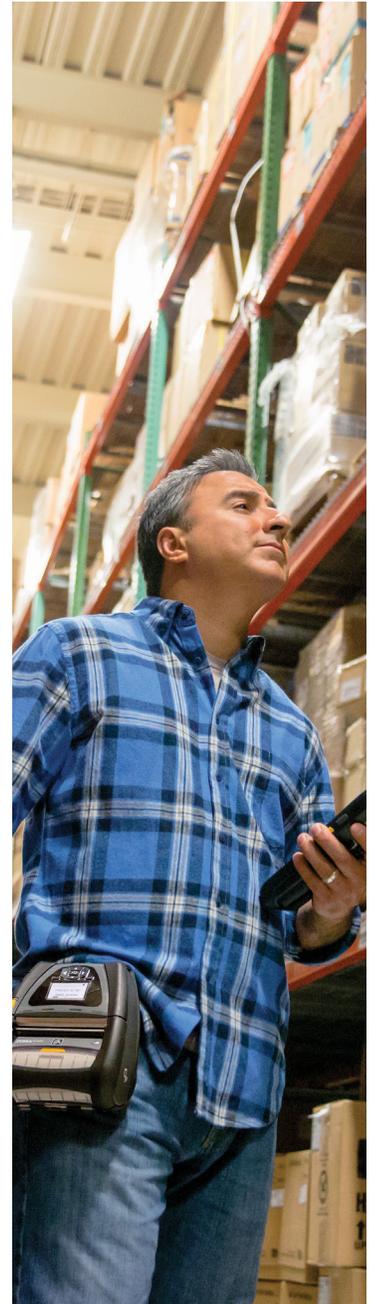

Zebra's Make-and-Hold gives you:

- Price protection during service agreement
- Flexible shipment dates and quantities
- No inventory carrying costs
- No lead times after initial run
- Renewable

### Supplies Management Program

Our most powerful solution; Zebra manages your custom label inventory based on a mutually agreed upon forecast. Perfect for customers with multiple shipping locations that require labels at different times. Always in stock, same day or next business day shipments. Zebra's Supplies Management Program provides:

- Price protection during annual agreement
- Same-day or next-day shipments
- No inventory carrying costs
- No lead times after initial run
- Renewable
